

## **CODEBOOK**

### **Visual Depictions in Drug Advertisements**

**DEFINITION OF UNIT OF ANALYSIS (VISUAL DEPICTION):** Each person or external body part, internal human body system, organ, sign of disease, virus or bacterium, medicine, and each drawing or photo in a drug ad will be coded. For instance, if a drug ad has a photo of a male physician holding a pill bottle, a microscopic view of a bacterial infection and a picture of a heart, all over an abstract, patterned background, then the visual depictions of the (1) physician, (2) pill bottle, (3) microscopic bacterial infection, (4) heart, and (5) abstract, patterned background would be coded separately.

**DATE OF JOURNAL ISSUE:** Record the Day, Month, and Year as shown on the front of the journal issue.

**AD IDENTIFICATION NUMBER:** Four digit number assigned a priori by the researcher, as indicated on a green sticker in the upper left corner.

**VISUAL DEPICTION NUMBER:** For each ad, each and every visual depiction (as defined by the definition of the unit analysis above) will be numbered a priori by the researcher, using yellow stickers.

**TYPE OF VISUAL DEPICTION:** The six include: (1) Person or external body part (hand, eye, leg), (2) Human internal physiology or organ system- e.g., heart and blood vessels; brain, nerves and neurons; stomach, esophagus and intestines; lungs; reproductive

system (uterus, fallopian tubes, ovaries); muscles, (3) Signs of disease- e.g., tumor; microscopic view of virus, bacteria; inflammation; headache; clogged artery, dead heart tissue, (4) medications- eg., images of medication bottle, capsules, pills, (5) Nondescript, abstract drawing or photo- e.g., patterned background, (6) other visual- e.g., animal, plant, environmental- e.g., ocean/seashore, lake, mountains, forest, farmland, urban, etc.
